Prepared By: Nico Ryan V. Dayao, PTRP Chief PT, Rehabilitation Medicine	Reviewed By: Redentor P. Alquiros, MD OIC, Ancillary Services Darius S. Sebastian, MD, MPH, PHSAE Hospital Administrator, Ospital ng Paranaque	Approved by: Jefferson R. Pagsisihan, MD, MHM Hospital Director, OspitalngParanaque

The PHYSICAL THERAPY AND REHABILITATION MEDICINE SECTION (PTRM) of the OSPITAL NG PARANAQUE (OsPar), is the one responsible in providing rehabilitative and physical therapy services to persons with disability and other clients by doing therapeutic services in the fields of physical therapy, gross and fine motor skills training, and wellness & health promotion.

Physical therapy is a medical service equipped to Physical Therapists in order to develop, maintain and restore maximum movement and functional ability throughout the lifespan of a patient/ client. The scope of physical therapy practice is dynamic and receptive to patient/client and societal health needs. It is concerned with circumstances where movement and function of neuromuscular, cardiovascular, and pulmonary systems are threatened by ageing, injury, pain, diseases, disorders, conditions or environmental factors. Evaluation and treatment using the right choice and application of appropriate therapeutic services such as physical agents and exercise is the main task of physical therapists.

The aim of PTRM is to identify and maximize quality of life by means of promotion, prevention, treatment/intervention, habilitation and rehabilitation. Holistic approach is intended to develop the full physical, social, emotional, vocational, avocational, educational and psychological potential of persons with disabilities stretching from the neurologic to the musculoskeletal, from the pediatric to the geriatric population.
