VI. Continuing Education Program of Staff

Training presents a prime opportunity to expand the knowledge base of all employees. This could also mean an improved employee performance and at the same time, a worthwhile investment for the employer.

The **Philippine Regulation Commission (PRC)** recently released the guidelines on the **Continuing Professional Development (CPD)**. Registered and licensed professionals shall complete the required units every 3 years before renewing their license.

The City Government of Parañaque fulfils its commitment to its staff for continuous development by allowing them to attend trainings and seminars, as well as covering the expenses.

The Radiologic Technologists of Ospital ng Parañaque take turns in participating in different trainings and seminars which enables them to gain further knowledge on the profession.
